

CUSTOMER SUPPORT

Support that works as hard as you do

Ensuring the performance of your mission critical applications is priority number one in today's enterprise. Precise Transaction Performance Management (TPM) solutions are your first line of defense against performance degradation, driving business results through transaction optimization. Ensuring the availability and effectiveness of your TPM solution can be a distraction for your already busy team. Precise Customer Support provides you the peace of mind to know that your TPM infrastructure is always operating at peak efficiency.

Support that works as intelligently as you do

Precise provides more than post-sales support to maintain your environment. Our experienced Technical Support Engineers (TSEs) bring with them an average of 10 years of expertise with Precise technology. This knowledge and experience helps you increase uptime, reduce Total Cost of Ownership (TCO), and drive more efficiency into many aspects of your critical business applications.

“Like our end-users, we appreciate quick response time. Precise’s sense of urgency and level of efficiency in resolving our support cases and troubleshooting issues is something we don’t see very often.”

- Sahil Vijay, Sr Basis Administrator Thomson Reuters

Support that works the way you do

Our support solutions are available through our globally distributed Customer Support Centers, staffed with highly trained TSEs. Following the sun, these centers are always available to our Essential Support contracted customers, so that they may receive support 24 hours a day, seven days a week, 365 days a year. Our well documented, formal handover and escalation procedures ensure that problems are handled quickly and effectively by experienced TSEs, every time.

Benefits

- » **PROBLEM RESOLUTION** Gain access to expert technical resources
- » **ACCESS** Take advantage of online around-the-clock self-solve support
